The terms of use for this study can be found at: http://www.icpsr.umich.edu/icpsrweb/ICPSR/studies/32961/terms

Information about Copyrighted Content

Some instruments administered as part of this study may contain in whole or substantially in part contents from copyrighted instruments. Reproductions of the instruments are provided as documentation for the analysis of the data associated with this collection. Restrictions on "fair use" apply to all copyrighted content. More information about the reproduction of copyrighted works by educators and librarians is available from the United States Copyright Office.

NOTICE WARNING CONCERNING COPYRIGHT RESTRICTIONS

The copyright law of the United States (Title 17, United States Code) governs the making of photocopies or other reproductions of copyrighted material. Under certain conditions specified in the law, libraries and archives are authorized to furnish a photocopy or other reproduction. One of these specified conditions is that the photocopy or reproduction is not to be "used for any purpose other than private study, scholarship, or research." If a user makes a request for, or later uses, a photocopy or reproduction for purposes in excess of "fair use," that user may be liable for copyright infringement.

Cognitive Function Form	66
Bioimpedance Measures	73
Additional Measures	77

DOCUMENTATION FOR THE PUBLIC-USE SWAN VISIT 10 DATASET

CHANGES IN THE 2018 DATA REFREEZE:

- A variable describing the race of participants (RACE) was added from the Screener dataset. See the Additional Measures section at the end of the codebook for more information.
- The race/ethnicity of one participant was originally mislabeled and has now been corrected. Race fields now read Caucasian, not Black, for this participant.
- If the interview was not completed, but the Self-A was completed, AGE was calculated based on the date the participant filled in the Self-A Questionnaire.
- Variables STATUS10 and LMPDAY10 have been updated and are pulled from another source that evaluated the
 menopause status related variables over time, and corrected inconsistencies via additional corroborating
 information. PLEASE NOTE: STATUS10 has been changed from the prior release to split the surgical category
 into 'Post by BSO (Bilateral Salpingo Oophorectomy)' and 'Unknown due to hysterectomy.' See the Additional
 Measures section at the end of the codebook for more information.
- For the Interview dataset:
 - Job start and stop times (D3) were changed to military time format, and the AM/PM variables dropped.
 - Estrogen drug (B14) was updated for one participant.
- For the Self-Administered, Part B, 44 women either left the entire questionnaire blank or refused all items. Their forms should have been set to off protocol, and they should not have been included. They have been removed,
- For Serum Hormone Measures dataset, the lower limit of detection (LLD) ranges have been updated. See the Additional Measures section at the end of the codebook for more information.
- Spine Bone Mineral Density changed slightly for 43 participants due to incorrect application of correction factors
- For bioimpedance measures (please note that the changes below caused changes to created variables):
 - o One participant's conductance was corrected
 - Five out of range raw values were updated to their original values, rather than -2222 (Invalid indicator).
 - Four instances where the participant was seated had their values for conductance and reactance set to missing.

1. Who is included in the public use dataset:

The dataset contains follow-up visit 10 information for the 3,302 women from the 7 clinical sites participating in the SWAN longitudinal study. The sites include Boston, MA, Pittsburgh, PA, Oakland and Los Angeles, CA, Detroit, MI, and Chicago, IL. Data was not collected from New Jersey for this visit.

2. How this codebook is constructed:

Following this documentation section are copies of each of the questionnaires that were used at visit 10. A list of additional variables is also provided. The questionnaires include the variables available for public use next to the question in bold red uppercase underlined letters. Those variables not available for public use have a # before the variable and are in blue. Any special notes are indicated with footnotes at the bottom of the page.

The assigned participant ID has been replaced with a randomly generated SWANID in order to protect participant privacy. The *baseline* interview date is denoted as day 0 and is used as the basis for all other dates. All other questionnaires or data collected that have a date attached have been converted to the number of days from the baseline interview. For example, if the Visit 10 Self-Administered Questionnaire Part A was collected 10 years after the baseline interview, the day for the Self-Administered Part A would be day 3,650 and the Baseline Interview would be day 0.

All variables for visit 10 have a 10 at the end of the variable name.

3. Missing data coding:

Missing codes are as follows: -1: not applicable, -7: refused, -8: don't know, and -9: missing.

Documentation 5

4. Ways this data can be used and additional notes

Interview Questionnaire

In general, most 'Other, specify' text fields are not included in the dataset.

- A menopausal status variable (STATUS10) was derived for all analyses of the SWAN data for the participant at visit 10.
- Age (AGE10) was calculated from date of birth to when the interview form was completed, and is rounded to the next lowest integer.
- CES-D scores can be created from the questions in F.4.
- A perceived stress score can be created from questions in F.3.
- A social support score can be calculated from the questions in F.2a-d after recoding them from a 1-5 range to a 0-4 range.
- o In depth complementary and alternative medicine questions are asked in questions C.1 through C.21.
- Several forms of the interview could be administered, depending on the amount of time available with the
 participant. This visit also implemented the final menstrual period form, which contains some of the same
 variables as are found in the interview. The flag FORMINT10 was set to indicate which version of the interview
 was administered:
 - a) FUI indicates participants that completed the full interview.
 - b) AINT (Abbreviated FU interview) (130 participants) completed an abbreviated interview in combination with either an abbreviated or full Self-Administered Part A form.
 - c) AFUI (Abbreviated Plus FU Interview) (16 participants) completed an abbreviated form of the interview that comprised key guestions from the interview and Self-Administered Questionnaire Part A.
 - d) FMP (Final Menstrual Period Form) (2 participant) could be filled in at the clinic, home or by mail.
 - e) The mail interview was discontinued with this visit.

Self-Administered Questionnaire Part A

The participant could fill in a full Self-Administered Questionnaire, Part A, a phone interview, or an abbreviated version as described above (AINT or AFUI). The flag FORMSAA10 delineates those who did the full questionnaire (SAA) from the 110 participants who did the abbreviated questionnaire (AIN), the 4 that did the phone interview (PAT) and the 16 that did the abbreviated plus follow-up interview (AFU).

- The income question (F.1) was condensed so that the income ranges were more broadly defined.
- Current smoking is defined as anyone who answered 'yes' to question B.9 (SMOKERE10) and an answer greater than 0 for B.9a (AVGCIGDA10).
- O Positive and Negative Affect Schedule (PANAS) Scores can be derived from questions H.1.a through H.1.t. A subset of the participants answered the Japanese version, which has 22 culturally appropriate items rather than the 20 items asked on the English version. There is no direct correlation between the two versions, so all Japanese items have been set to missing. In addition, question H.1.b has been set to missing because 'disinterested' was on the form, but the correct PANAS term is 'distressed.' It is suggested that the raw 9 item negative affect score, when multiplied by 1.112, can be made comparable to the positive affect score and the outcomes found in the literature.
- SF-36 scores for all eight of the subscales can be derived according to the SF-36 User's Manual. Responses may need to be reversed where necessary so that all items are positively scored. Thus for each scale, a higher value indicates better functioning. The Bodily Pain Score is calculated from questions B.20 and B.21. Item recoding depends on whether both questions were answered or one of the items has missing data. After recoding, all the items are positively scored so that a higher score indicates less pain. The Vitality Score is calculated from questions B.22.a, .e, .g and .i. Questions B.22.a and B.22.e should be reversed so that all items are positively scored; for the resulting index a higher score indicates greater energy (and less fatigue). The Social Functioning Score is calculated using questions B.19 and B.23. Question B.19 is reversed so that all items are positively scored; for the resulting index a higher score indicates better social functioning. The Role-Emotional Score is calculated using questions B.18a-c. All items are positively scored, so a higher score indicates better role-emotional functioning. The Mental Health Score is calculated from questions B.22.b - .d, B.22.f and B.22.h. Questions B.22.d and B.22.h were reversed so that all items are positively scored; for the resulting index a higher score indicates participant feels peaceful, happy and calm all of the time. The General Health Score is calculated from questions B.1. and B.24.a-d. Questions B.1, B.24.b and B.24.d were reversed so that all items are positively scored; for the resulting index a higher score indicates participant believes personal health is excellent. The Physical Functioning Scores are calculated from questions B.16.a-j. All items are positively scored; for the resulting index a higher score indicates ability to perform all types of physical activities including the most

Documentation 6

- vigorous without limitations due to health. The Role-Physical Score is calculated from question B.17a-d. All four questions were reversed so that all items are positively scored; for the resulting index a higher score indicates no problems with work or other daily activities as a result of physical health.
- Life Events can be calculated from questions E.1.a-r. A total number of life events can be calculated, a score that totals the number of 'very upsetting' stressful life events, and a categorical event score can be calculated where 0 = no very upsetting/stressful life events, 1 = one very upsetting/stressful life event, and 2 = two or more very upsetting/stressful life events.
- The flag FLGSAAV10 is set for the one participant who completed the questionnaire after the 01/31/2008 cutoff.

Self-Administered Questionnaire Part B

- The flag FLGSABV10 is set for the 1 participant who completed the guestionnaire after the 01/31/2008 cutoff.
- There are inconsistencies with the answering of this questionnaire, but due to the nature of the form, the
 interviewers did not contact the participant to clarify the information.

Physical Measures

- In addition to the variables on the form, BMI10 was also calculated as weight in kilograms divided by the square
 of height in meters.
- Self-reported weight and height were collected, along with the reason for using self-reported measures.

Cognitive Function Form

- o Individual and summary scores are available for the following tests: East Boston Memory Test (both the immediate and delayed recall of a story), Symbol Digits Modalities Test, and the Digits Backward Test.
- Several special codes were used in this dataset to indicate why tests (and test items) were not administered:
 - 6 = Not administered because of physical impairment
 - 7 = Not administered because of verbal refusal
 - 8 = Not administered because of a behavioral reason
 - 9 = Not administered for some other reason
 - 10 = Administered but not according to protocol
- The flag FLGCOG10 is set for the 1 participant who completed the questionnaire after the 01/31/2008 cutoff.

Additional Measures

Several variables pertaining to the blood draw (serum hormone and cardiovascular measures) that were part of the follow-up interview were moved to a separate questionnaire. Those variables are now included in this part of the data dictionary.

Serum Hormone Measures

The Visit 10 hormone results are included. Of special note is that the estradiol assay was run in duplicate. The average (E2AVE10) is the within-person arithmetic average of the two assays. A flag indicates if the estradiol results differed by > 10 pg/mL where one or both results <= 20 pg/mL. Hormone results below the lower level of detection (LLD- see table in the Additional Measures section) were recoded to an .L value.

- o Thyroid-stimulating hormone (TSH), which was last collected in Visit 4, is collected with visit 10.
- The flag FLGHRMV10 is set for the 2 participants who completed the questionnaire after the 01/31/2008 cutoff.

Cardiovascular Measures

Blood samples to perform the cardiovascular assays were collected at Visit 10, but will be assayed at a later date.

Bone Mineral Density Measures

Five of the seven sites participated in the bone study – Detroit, MI, Boston, MA, Oakland and Los Angeles, CA, and Pittsburgh, PA. Total spine and total hip bone mineral density (BMD) measures are provided.

Bioimpedance Measures

Body composition was measured using bioimpedance equipment. Percent body fat (equation provided by Dr. MaryFran Sowers), skeletal muscle mass (Janssen, 2000), fat free mass, total body water, and percent body fat (all provided by RJL

Documentation 7

Systems and validated using NHANES III data (Chumlea, 2002)) are also provided. Variable MISSPHY10 flags where missing physical measures caused the created variables to be missing, and MISSCON10 flags where conductance was missing. A flag (FLAGSRP10) indicates where self-reported physical measures were used in calculations. A flag FLGBIOV10 indicates where one participant completed the bioimpedance measures after the Visit 10 cutoff (01/31/2008).

Additional variables

Menopausal status (STATUS10) and last menstrual period day (LMPDAY10) are also provided. Participant race/ethnicity (RACE) is provided from the Screener dataset. See the Additional Measures section at the end of the codebook for descriptions.

Date of completion variables (INTDAY10, SAADAY10, SABDAY10, PHYDAY10, HRMDAY10, COGDAY10, BIODAY10, CAMDAY10, SPSCDAY10, HPSCDAY10, LMPDAY10, HYSTDAY10) are given in days from interview date at baseline. Note that for 5 participants, interview completion dates at baseline were not available and alternative dates were substituted either from the Self-Administered Questionnaire-A or Physical Measures completion dates at baseline.

We have some questions that we are asking you to complete on your own. If anything is unclear to you, please feel free to ask questions. Study representatives are available and happy to help you. Please take as much time as you need with each question. It is very important to us that you complete the entire questionnaire. Please find the most appropriate response to each question and circle the number for the answer you choose.

Please remember that this information will remain confidential.

Thank you for your participation in this important study.

We are interested in learning more about women's health during their 40's, 50's and 60's. This first set of questions asks about your health and use of health care. B1 In general, would you say your health is excellent, very good, good, fair or poor? (PLEASE CIRCLE ONE RESPONSE.) Excellent 1 Very good _______2 Fair 4 Don't know --8 B2. Since your last study visit, how many different times did you stay in the hospital overnight or longer? # TIMES **HOSPSTA10** Since your last study visit, about how many times did you see or talk to a doctor, nurse practitioner or B3. other health care provider, regarding your own health? (Do not count hospitalizations or visits for this study.) ___ # TIMES MDTALK10 B4. Since your last study visit, about how many times did you see or talk to a health care provider or other professional for problems with emotions, "nerves", or mental health? ___ # TIMES **NERVES10** Since your last study visit, have you had: (PLEASE CIRCLE 1 FOR NO OR 2 FOR YES FOR EACH QUESTION.) This questionnaire covers material that is sensitive and personal. For some women, sexual activity is an important part of their lives, but for others, it is not. Everyone has different ideas on this subject. To help us understand how these matters affect women's lives and health, we would like you to answer the following questions from your own personal viewpoint. There are no right or wrong answers. Remember, confidentiality is assured. While we hope you are willing to answer all of the questions, if there are questions you would prefer not to answer, you are free to skip them. Please find the most appropriate response to each question, and circle the number for the answer you choose.

B1.	How important is sex in a	your life?	(CIRCLE ONE NUMBER)	IMPORSE10
D1.	TIOW IIIIportant is sex in	your mc:	CINCLE ONE NUMBER	INII OKSEIU

1	2	3	4	5
Extremely	Quite	Moderately	Not very	Not at all
important	important	important	important	important

1	2	3	4	5
Not at all	Once or	About	More than	Daily
	twice per month	once per week	once per week	

B3. During the past 6 months, have you engaged in sexual activities with a partner? (CIRCLE ONE NUMBER) **ENGAGSE10**

No 1	(GO TO B3.a)
Yes	(GO TO B4)

B3.a People do not engage in sexual activities with partners for many reasons. Please circle 1 (NO) or 2 (YES) for each reason listed below. Please						
answer <u>all four</u> questions.						
I have not had sex in the last 6 months because:						
	NO	YES				
1) I do not have a partner at this time.	1	2				
NOPARTN10						
2) My partner has a physical problem that interferes	1	2				
with sex. PARTPRO10						
3) I have a physical problem that interferes with sex.	1	2				
PHYSPRO10						
4) Other: Please Specify NOSEXOT10	1	2				
#NOSEXSP10						
PLEASE TURN TO PAGE 6, AND ANSWER QU	ESTION	B14				

B4. In the past 6 months, how emotionally satisfying was your relationship with your main partner?

		SATISFY10		
1	2	3	4	5
Extremely	Very	Moderately	Slightly	Not at all
satisfying	satisfying	satisfying	satisfying	satisfying

B5. During the past 6 months, how often, on average, have you engaged in each of the following sexual activities? (CIRCLE ONE ANSWER FOR EACH QUESTION. IF AN ACTIVITY DOES NOT APPLY TO YOU, CIRCLE 1 [NOT AT ALL].)

		Not at all	Once or twice per month	About once per week	More than once per week	Daily
a)	Kissing or hugging?	1	2	3	4	5
b)	KISSING10 Sexual touching or caressing?	1	2	3	4	5
c)	TOUCHIN10 Oral sex?	1	2	3	4	5
d)	ORALSEX10 Sexual intercourse? INTCOUR10	1	2	3	4	5

Please answer the following questions, B6 – B8, about sexual activity with your partner(s).

B6. During the last 6 months, how often did you feel aroused during sexual activity? **AROUSED10**

1	2	3	4	5
Always	Almost	Sometimes	Almost	Never
	always		never	

B7. During the past 6 months, have you felt vaginal or pelvic pain during intercourse? **PELVIC10**

1	2	3	4	5	6
Always	Almost	Sometimes	Almost	Never	No
	always		never		intercourse in
					last 6 months

B8. During the last 6 months, how often have you used lubricants, such as creams or jellies, to make sex more comfortable?

LUBRICN10

1	2	3	4	5	6
Always	Almost	Sometimes	Almost	Never	No
	always		never		intercourse in
					last 6 months

Please answer the following questions, B9 – B12, about sexual activity with your partner(s).

B9. During the past 6 months, how often were you able to reach climax (come)? ABLECLM10

1 2 3 4 5
Always Almost Sometimes Almost Never always never

B10. During the past 6 months, how often was it important for you to reach a climax? **IMPCLMX10**

1 2 3 4 5
Always Almost Sometimes Almost Never always never

B11. During the past 6 months, how often did you feel satisfied after sexual activity? **SATISFD10**

1 2 3 4 5
Always Almost Sometimes Almost Never always never

B12. During the past 6 months, how often were you satisfied with the frequency of sexual activity?

1 2 3 4 5
Always Almost Sometimes Almost Never always never

We have a couple final questions for you. We are asking this next question to gather information about the risk of acquiring HIV/AIDS and other sexually transmitted diseases. We understand that this question is very personal. There are many women in this study with a wide range of experiences. Please answer only if you have had sex with men in the last six months. Your answers are important in this research study and will be kept confidential.

B13. Over the past 6 months, how many men have you had intercourse with?

MEN6MOS10

 Zero
 1

 One
 2

 Two
 3

 Three
 4

 Four - ten
 5

 More than 10
 6

B14. On average, in the last 6 months, how often have you engaged in masturbation (self-stimulation)?

MASTURB10

Thank you for helping us with this important research study.

Please place the completed questionnaire in the envelope provided, seal it, and give it to the study personnel.

B. EAST BOSTON MEMORY TEST I

I have some questions that involve remembering things and concentrating. Please try your best.

INTERVIEWER NOTE: RECORD ALL ANSWERS PROVIDED BY THE PARTICIPANT. ALL RESPONSES MUST BE GIVEN **WITHOUT** ANY AID TO MEMORY.

I. IMMEDIATE RECALL OF STORY

Now I would like to ask you to try to remember a short story.

First, I'm going to read you a short story and when I'm through, I'm going to wait a few seconds and then ask you to tell me as much as you can remember.

The story is:

Three children were alone at home and the house caught on fire. A brave fireman managed to climb in a back window and carry them to safety. Aside from minor cuts and bruises, all were well.

RECORD RESPONSE VERBATIM	SCORE EACH ABSENT	H IDEA AS	PRESENT OR
IMEDTHR10	Idea	Present	Absent
IMEDCH110	Three	1	0
	Children	1	0
IMEDHOU10	House	1	0

IMEDINJ10	Everyone	1	0
	Well	1	0
IMEDEVR10 IMEDWEL10 TOTIDE110	Total Ideas		

C. SYMBOL DIGIT MODALITIES TEST

Now, we are going to try something a little different.

PLACE THE LAMINATED TEST FORM IN FRONT OF RESPONDENT RESPONSES ON A BLANK SDMT FORM.

POINT TO KEY AT TOP OF PAGE AND SAY: Look at these boxes. Notice that each box has a little mark in the upper part and a number in the lower part. Each mark has its own number. Now look down here. [POINT]

Notice that the boxes on the top have marks, but the boxes on the bottom are empty. I want you to call out the number that goes with each mark. For example, look at the first mark and then look at the key. [POINT]

The number 1 goes with the first mark. So you call out the number 1 for the first box.

POINT OUT NEXT 2 ANSWERS: A 5 goes with this mark, and a 2 goes with this mark.

Now what number belongs in the next box?

POINT TO BOX IF NECESSARY. RECORD RESPONSE.

IF RESPONSE IS CORRECT, SAY: Good. You have the idea.

IF RESPONSE IS INCORRECT, SAY: No, that is a 1. AND POINT TO THE APPROPRIATE SYMBOL/ITEM PAIR IN KEY.

Now, for practice, tell me the numbers that belong in the rest of the boxes up to this line.

DRAW OVER THE DOUBLE LINE IN THE PRACTICE ROW.

Use your finger as you move along the row so you don't get lost.

RECORD RESPONSES TO REMAINING PRACTICE ITEMS (ANSWERS: 3 6 2 4 1 6). IMMEDIATELY CORRECT EACH ERROR AS ABOVE. RECORD "0" FOR NON-NUMERIC RESPONSES.

REINSTRUCT AND/OR ENCOURAGE GUESSING IF RESPONDENT IS CONFUSED ON THE PRACTICE ROW; E.G., If you don't know, guess a number from 1 to 9, and I'll tell you if you're right or wrong.

AFTER PRACTICE ROW IS COMPLETED, SAY:

Good, you know how to do them. I have some more of these I want you to do. When I tell you to begin start here [POINT TO THE FIRST SQUARE TO RIGHT OF DOUBLE LINE] and call out the numbers just like you have been doing until I say 'Stop.' If you make a mistake, tell me what you think the correct answer is. Do not skip any boxes and work as quickly as you can. Ready? Begin.

START TIMER AT "BEGIN," ALLOW 90 SECONDS, AND THEN SAY: Stop.

RECORD RESPONSES.

DO NOT REINSTRUCT FURTHER; IF PRESSED, SAY: Just do the best you can.

SYMBOL DIGIT MODALITIES TEST (CONTINUED) – SCORING:

1. Adminis	stra	tion status (1, 6-10)			SDMTSTA10
1	=	Test administered			
6	=	Not administered because of physics	al impairment		
7	=	Not administered because of verbal	refusal		
8	=	Not administered because of a behavior	vioral reason		
9	9 = Not administered for some other reason				
		Specify #SDMTSPE10			
10	10 = Administered but not according to protocol				
		Specify			
2. Number	r of	Test Administrations			SDMTADM10
3. Number	r of	Practice Items Correct (0-7)			SDMTPRA10
4. Number of Test Items Attempted (0-110) <u>SDMTATM10</u>					
5. Number of Test Items Correct (0-110) SDMTCOR10					

D. DIGITS BACKWARD

<u>ADMINISTRATION:</u> MAKE SURE YOU HAVE RESPONDENT'S ATTENTION BEFORE PRESENTING EACH ITEM. READ DIGITS CLEARLY AT ONE-PER-SECOND RATE, LETTING VOICE PITCH DROP/RISE ON LAST DIGIT. PRESENT EACH ITEM ONLY ONCE. IF REPETITION IS REQUESTED, SAY: Just tell me what you can remember.

DISCONTINUE AFTER TWO CONSECUTIVE ERRORS <u>AT A GIVEN ITEM LENGTH</u> (e.g., IF BOTH 4a AND 4b ARE ERRORS). IF REQUESTED, REINSTRUCT: After I say the numbers, you are to say them backwards.

IF RESPONDENT REPEATS THE NUMBERS FORWARD, SCORE THE RESPONSE AS AN ERROR (0) AND REINSTRUCT AS ABOVE. ONLY ONE UNREQUESTED REINSTRUCTION IS PERMITTED.

SCORING: CLASSIFY EACH RESPONSE AS ERROR (0) OR CORRECT (1) AND ENTER THE SCORE IN THE SPACE PROVIDED. FOR ITEMS NOT ADMINISTERED DUE TO BRANCHING OR DISCONTINUATION RULE, PLACE AN "-1" IN THE SPACE PROVIDED; FOR ITEMS NOT ADMINISTERED FOR ANY OTHER REASON, ENTER THE APPROPRIATE CODE: 6 = PHYSICAL IMPAIRMENT; 7 = VERBAL REFUSAL; 8 = BEHAVIORAL REASON; 9 = OTHER REASON.

<u>INSTRUCTION:</u> Now, let's move on to another part. I am going to say some numbers. When I stop, I want you to say them backwards.

ITEM RESPONSE CODE

P1. Try this one : 2 - 8 - 3."

IF <u>CORRECT</u> (1), SAY: That's right. Now I have some more numbers. Remember, you are to say them backwards.

[GO TO 1a]

IF <u>ERROR</u> (0), SAY: No, I said 2 - 8 - 3, so to say them backwards, you would need to say 3 - 8 - 2.

[GO TO P2]

P2. Try this one. Remember, you are to say them backwards. Ready? 1 - 5 - 8.

IF <u>CORRECT</u> (1), SAY: That's right. Now I have some more numbers. Remember, you are to say them backwards.

[GO TO 1a]

IF <u>ERROR</u> (0), SAY: No, I said 1 - 5 - 8, so to say them backwards, you would need to say 8 - 5 - 1. Now I have some more numbers. Remember, you are to say them backwards.

DIGITS BACKWARD (CONTINUED)

0 = Error

1 = Correct

-1 = Not Administered due to discontinuation rule

6 = Not administered because of physical impairment

7 = Not administered because of verbal refusal

8 = Not administered because of behavioral reason

9 = Not administered for some other reason, Specify below

10 = Administered but not according to protocol, Specify below

B11.	COMMENTS: _	#OPERCO110	#OPERCO210	
REM	OVE AND DISPOS	E OF THE ELECTRODES	S. BE SURE NOT TO INJURE THE SUBJ	ECT'S SKIN

IF YOU HAVEN'T ALREADY DONE SO, COMPLETE QUESTION A10 = "YES (2)."

Thank you for your participation in this study.

IF AN <u>'OUT OF RANGE'</u> CONDUCTANCE OR REACTANCE IS DETECTED, IMMEDIATELY CHECK THE QUALITY OF THE ATTACHMENT OF THE ALLIGATOR CLAMPS AND THE SECURITY OF THE ELECTRODES TO THE SKIN. THEN, RE-DO THE PROCEDURE.

IF THE SECOND MEASUREMENT FALLS WITHIN THE VALID RANGE, IT SHOULD BE ENTERED INTO THE FIELD FOR Q.B8 OR Q.B9. THE INITIAL MEASUREMENT SHOULD BE RECORDED IN THE COMMENTS (Q.B11) AND Q.B10 SHOULD BE CODED "2=YES" RE-RUN.

IF THE SECOND ATTEMPT ALSO RESULTS IN AN INVALID RANGE, THEN VALIDATE WITH 500 OHM RESISTOR AND RE-RUN A THIRD ATTEMPT. IF THE *THIRD* MEASUREMENT FALLS WITHIN THE VALID RANGE, IT SHOULD BE ENTERED INTO THE FIELD FOR Q.B8 OR Q.B9. IF *THIRD* ATTEMPT VALUES ARE STILL INVALID, CODE "-2222" INSTEAD OF OUT OF RANGE VALUE. THE *INITIAL* AND *SECOND* MEASURMENTS SHOULD BE RECORDED IN THE COMMENTS (Q.B11) AND Q.B10 SHOULD BE CODED "2=YES" RE-RUN.

THE ABOVE PROCEDURES SHOULD ALSO BE FOLLOWED IF A *VALID BUT NEGATIVE* VALUE (BETWEEN -1 AND -800) IS DETECTED FOR CONDUCTANCE (Q.B8). IF THE SECOND OR THIRD CONDUCTANCE MEASUREMENT RESULTS IN A POSITIVE VALUE, IT SHOULD BE ENTERED INTO Q.B8 AND THE INITIAL MEASUREMENT(S) SHOULD BE RECORDED IN THE COMMENTS (Q.B11) AND Q.B10 SHOULD BE CODED "2=YES" RE-RUN. IF ALL THREE MEASUREMENTS RESULT IN A NEGATIVE VALUE, THEN THE FINAL <u>VALID</u> MEASUREMENT (BETWEEN -1 AND -800) SHOULD BE ENTERED INTO Q.B8.

ADDITIONAL MEASURES COLLECTED

The following answers pertain to the serum hormone measures:

A9.	WAS BLOOD DRAWN?	BLDDRAW10

[†] This date is given in days since the initial baseline interview, which is day zero.
Variable Excluded from Public Use Data File
Additional Measures

SERUM HORMONE MEASURES

1. Variables for assays

Variable	Assay	Units
DHAS10	Dehydroepiandrosterone sulfate	ug/dL
E2AVE10*	Estradiol (see important note below)	pg/mL
FSH10	Follicle-stimulating hormone	mIU/mL
SHBG10	Sex hormone-binding globulin nM	
<u>T10</u>	Testosterone	ng/dL
TSH10	Thyroid-stimulating hormone	ulU/mL

^{*} IMPORTANT NOTE: There were originally two estradiol result variables because estradiol was run in duplicate. E2AVE2 is the within-person arithmetic average of the two estradiol variables.

2. Flags and other variables

Variable	Meaning	Codes
CYCDAY10	Day of cycle	n/a
FLGCV10	Both Estradiol results are > 20 pg/mL and the within- subject coefficient of variation (CV) is > 15%.	0=no, 1=yes
FLGDIF10	One or both Estradiol results ≤ 20 pg/mL and the difference between them is > 10 pg/mL.	
	Note: Differences were found between some of the Estradiol duplicate measurements. The following guidelines were decided upon: 1. If both E2 values>20 pg/ml, CV must be ≤15%. 2. If one or both E2≤20 pg/ml, the two E2 results must agree within 10 pg/ml.	
	DATA WITH THESE FLAGS SHOULD BE OMITTED FROM DATA ANALYSES, OR USED WITH CAUTION IF INCLUDED IN ANALYSES.	

^{*1=}yes means flagged

3. Changes to the data:

- Lower limit of detection (LLD). Hormone results below the LLD were recoded to a value of '.L'.
- LLDs changed over time. The following LLDs were provided by the lab and apply to all samples through 2009:

Hormone	Time Window on hormone measurement	Lower Limit of Detection
DUEAG	corresponding to LLD	4 50//////
DHEAS	~ Sep. 15, 1997	<1.52 ug/dL (Initial value)
	Sep. 16, 1997 ~ Jan. 14, 1999	<0.304 ug/dL
	Jan. 15, 1999 ~	<1.5 ug/dL
E2	~ Feb. 20, 2000	<1.0 pg/mL (Initial value)
	Feb. 21, 2000 ~ Aug. 27, 2001	<2.0 pg/mL
	Aug. 28, 2001 ~ May 03, 2009	<4.0 pg/mL
	May 04, 2009 ~	<7.0 pg/mL
FSH	~ Aug. 05, 1999	<1.05 mIU/mL (Initial value)
	Aug. 06, 1999 ~ Nov. 10, 1999	<1.0 mIU/mL
	Nov. 11, 1999 ~ Jul. 19, 2000	<0.7 mIU/mL
	Jul. 20, 2000 ~ Oct. 29, 2002	<0.6 mIU/mL
		<0.5 mIU/mL
	Sep. 29, 2003 ~ Feb 20, 2006	<0.4 mIU/mL
	Feb 21, 2006 ~	<0.8 mIU/mL
SHBG	~ Aug. 05, 1999	<1.95 nM (Initial value)
	Aug. 06, 1999 ~ Oct. 31, 1999	<1.9 nM
Nov. 01, 1999 ~ Mar. 22, 2006		<2.0 nM
	Mar. 23, 2006 ~	<3.2 nM
Т	~ Jun. 04, 1998	<2.19 ng/dL (Initial value)
	Jun. 05, 1998 ~ Jun. 17, 1999	<2.2 ng/dL
	Jun. 18, 1999 ~	<2.0 ng/dL
TSH	~ Sep. 24, 2000	<0.03 uIU/mL (Initial value)
Sep. 25, 2000 ~ Jun. 21, 2006		<0.13 uIU/mL
Jun. 22, 2006 ~ Mar. 26, 2007		<0.011 uIU/mL
	Mar. 27, 2007 ~	<0.01 uIU/mL

BONE MINERAL DENSITY MEASURES

Five of the seven clinical sites did DXA bone scans on the spine and hip. The total bone mineral density scores had to be calibrated in order to apply machine change calibration correction factors.

Variable	Meaning	Codes
SPSCDAY10	Spine Scan Day	
SPSCTIM10	Spine Scan Time	
SPSCMOD10	Spine Scan Mode	5 = 2000 machine
		11=4500 machine
HPSCDAY10	Hip Scan Day	
HPSCTIM10	Hip Scan Time	
HPSCMOD10	Hip Scan Mode	5 = 2000 machine
		11=4500 machine
SPBMDT10	Total Spine BMD w/cross-calibration applied	
HPBMDT10	Total Hip BMD w/cross-calibration applied	

MENOPAUSAL STATUS MEASURES

Variable	Meaning	Codes
STATUS10	Menopausal Status	1 = Post by BSO (Bilateral Salpingo Oophorectomy) 2 = Natural Post 3 = Late Peri 4 = Early Peri 5 = Pre
		6 = Pregnant/breastfeeding 7 = Unknown due to HT use 8 = Unknown due to hysterectomy

<u>STATUS10</u> represents menopausal status, and is determined from questions on bleeding patterns, current hormone use, pregnancy, breastfeeding, hysterectomy, and oophorectomy. Menopause status is compared across visits, and no women were allowed to move backwards in status (e.g. early peri at Visit 08 could not be pre at Visit 09)

<u>Post by BSO</u> - women with both ovaries removed (Bilateral Salpingo Oophorectomy or BSO) prior to natural post menopause

Natural Post - women who had no bleeding in the 12 months prior to the visit

<u>Late Perimenopause</u> - women who had bleeding in the last 12 months prior to her visit but no bleeding in the past three months

<u>Early Perimenopause</u> - women who had bleeding in the last three months but who said their menstrual periods had become farther apart, closer together, more variable, or more regular

<u>Premenopausal</u> - women who reported bleeding in the past three months and who responded that their menstrual periods had stayed the same since their last visit

Pregnant/breastfeeding – women who reported a pregnancy since the last visit or are currently breastfeeding

<u>Unknown due to HT use</u> - pre- and perimenopausal women using hormones, including birth control pills, estrogen, and progestin, patches and a few vaginal hormones

Unknown due to hysterectomy – women who reported hysterectomy without BSO prior to natural post

<u>LMPDAY10</u> is the number of days from baseline (Day 0) to the date of the last menstrual period at Visit 10. It is pulled from another source that evaluated the menopause status related variables over time, and corrected inconsistencies via additional corroborating information

RACE/ETHNICITY

RACE Participant race/ethnicity is provided from the Screener dataset:

Variable	Meaning	Codes
RACE	Race at Screener (Screener Q.33, modified)	 Black/African American Chinese/Chinese American Japanese/Japanese American Caucasian/ White Non-Hispanic Hispanic
